Open ports discovery

CONFIRMED

Target host	Status
192.168.40.122	Host is down. If you know the target is up and running, please rescan with the "Check if host is alive before scanning" option disabled.

Details

Risk description:

The Check alive mechanism is designed to perform a fast check by sending different types of probes on some of the most popular ports. The target did not respond to any of the probes that we sent, which is why it was interpreted as being down.

Recommendation:

If you know the target is up and running, please rescan with the "Check if host is alive before scanning" option disabled.
